INSTRUCTIONS FOR
BV-04 BEAD VICE

BV-04 BEAD VICE

INSTRUCTIONS

As you may have noticed, a new type of rim has made its appearance in Europe. This so called "EVA wheel" has a (safety) hump located behind the valve stem which is causing difficulties dismounting and inflating tires.

Gaither's Bead Vice (patent pending), in combination with Super Slick'em (1 gal. included free of charge), is the only system available that easily breaks the beads down and across the hump in just a few seconds without damaging either bead or rim!!

- Before attaching the Bead Vice to the stud hole of the EVA wheel (17.5"–22.5"), apply Super Slick'em between the wheel and the bead area of the tire.
- Remove the valve core.
- After the air has escaped from the tire, place and impact gun (38mm socket) at the top of the Bead Vice and push the bead of the tire away from the wheel.

ABOUT US

Gaither Tool Company, Inc. founded in 1988, is an international organization committed to serving the tire and trucking industry. It invents and manufactures convenient tools and systems needed to service and maintain tires and wheel assemblies.

Gaither Tool Company, Inc. continually invests in research and development to bring to its customers the most effective tools in the business. It strives to improve efficiency and reduce costs for customers all over the world working in truck maintenance shops as well as on-the-road tire service providers. Bandag, Euromaster/Michelin, Bridgestone's First Stop, The United States Armed Forces... just to name a few.

Gaither supplies products to customers in over 100 countries, selling through exclusive and nonexclusive distributors. Gaither Tool Company, Inc. is headquartered in Jacksonville, Illinois, U.S.A. In 1997 it opened a branch office located in Roosendaal, Holland to better serve the European market. In 1999 that office was incorporated in Holland and Gaither Europe BV was started. Gaither's manufacturing plant and warehousing for International distribution is located in Taichung, Taiwan.

With a strategically placed location in both The United States and The Netherlands, we are able to serve the global industry
